LiberUp JPK_VAT product specification

Scope of the installed product. Read this specification with the Terms, EULA, payment, complaint and safety rules. Price, period and licence quantity follow the individual order.

Version: 2.3-draft-2026-10-06 | Updated: 2026-10-06

Effective date: [EFFECTIVE DATE TO BE COMPLETED]

DRAFT: New package draft. LiberUp must approve the effective date and release acceptance.

---

1. Product and scope

LIBERUP SPÓŁKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ supplies the installed LiberUp JPK_VAT application. Input files, analysis, repairs and reports are processed locally. The software runs technical structure checks and proposes specific repairs requiring user selection. It does not perform a complete ledger audit or a legal assessment of transactions.

Supported schemas: JPK_V7M(1), JPK_V7K(1), JPK_V7M(2), JPK_V7K(2), JPK_V7M(3), JPK_V7K(3). New schemas require a software update. Checks depend on the software version; absence of a technical error does not establish tax correctness or MF acceptance. The application does not submit declarations or issue an official receipt (UPO).

2. Requirements and installation

The package targets Windows x64. The MSIX manifest minimum is Windows 10 22H2, build 19045; the system must also be securely maintained and have required updates. This does not promise support for every Windows version or compatibility with macOS, Linux or ARM64. Check the specific release requirements before purchase.

Windows App Installer installs MSIX. Permissions to install packages from the signed publisher and space for the application and local working files are required. The self-contained release contains its .NET runtime; company policies may restrict installation or connections.

3. Access and connections

A LiberUp account and Internet access are required for purchase, download, sign-in, access grants and updates. Analysis does not require sending files to LiberUp. Following verification, offline access lasts at most 72 calendar hours and never exceeds grant validity. The EULA describes device removal and revocation.

Each new licence provides 3 device slots; additional units are separate licences. The 1-, 3- and 12-month periods do not change functionality. There is no trial. Expiry blocks new operations, but the user retains saved outputs.

4. Updates and support

During paid access, published releases and updates needed for conformity and security are available under the EULA. App Installer may check at launch and in the background; the manifest specifies a 4-hour check interval. Checking does not upload JPK files.

Email support operates Monday–Friday, 09:00–17:00 Warsaw time, targeting an initial response within 3 business days. This is not a repair deadline. Complaints and statutory rights follow separate rules.

5. Purchase documents

The specification version and offer description are recorded for new orders. The confirmation and contract archive identify documents for that purchase; updating the application does not replace historical terms. Statutory conformity rights remain. The Complaints and withdrawal document provides withdrawal rules.

The software is digital content supplied without a tangible medium. The Complaints and withdrawal document describes immediate supply and the statutory withdrawal exception. This does not exclude liability for product non-conformity.

Legal bases

Ustawa o prawach konsumenta — art. 2 pkt 5, art. 12 ust. 1, art. 43k / Consumer Rights Act
