LiberUp cookie policy

Browser technologies, their purposes and managing choices. The Privacy policy provides related personal-data information.

Version: 2.5-draft-2026-10-14 | Updated: 2026-10-14

Planned effective date: 2026-10-07

DRAFT: Planned date: 2026-10-07. Outstanding matters, approval and publication must be completed; this remains a draft and does not amend existing contracts. Later publication requires an appropriate effective date. The date alone does not activate sales or renewals.

---

1. Responsibility and scope

LIBERUP SPÓŁKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ, UL. OZORKOWSKA 13A , 95-100 ZGIERZ, is responsible for technologies on liberup.pl. Contact: contact@liberup.pl. Cookies are information stored in the browser; this policy also covers similar device storage and access.

Essential technologies support a user-requested function or transmission. Optional analytics and marketing require separate assessment and prior consent where required. Merely continuing to browse is not consent.

2. Current inventory

auth_token — LiberUp first-party cookie for sign-in and access control, up to 7 days; HttpOnly, SameSite=Lax, Path=/, Secure on HTTPS. Deleting it signs the user out or prevents the session from persisting.

mfa_challenge — LiberUp first-party cookie linking a temporary additional login verification, up to 10 minutes; HttpOnly, SameSite=Strict, Path=/, Secure on HTTPS. It appears only in the relevant MFA flow; deletion requires verification to restart.

liberup_locale — LiberUp first-party cookie for the chosen PL/EN language, up to 365 days; HttpOnly, SameSite=Lax, Path=/, Secure on HTTPS. Selecting or saving a language may renew its storage period.

liberup_cookie_consent — LiberUp first-party cookie recording optional-category choices and choice version, up to 180 days; SameSite=Lax, Path=/, Secure on HTTPS. Interface code reads it to manage consent settings. It is not used for advertising tracking in this context.

The period is the maximum browser lifetime for that record; sign-out, reconfiguration, user deletion or server invalidation may end its operation earlier. Not every cookie appears on every visit.

3. Optional technologies and links

Google Analytics, Google Ads and AdSense are not currently enabled. Selecting a consent category does not itself mean a tool is active. Enabling a new tool requires disclosure of its name, provider, purpose, duration, recipients and transfers, and renewed consent where the scope has changed.

Facebook, X, YouTube and Instagram icons are links without pixels, tracking plugins or embedded videos. Payment may redirect to an active Stripe, Przelewy24 or Paynow service. External domains follow their operators’ documents and settings; LiberUp does not set consent on those websites for the user.

4. Choice and withdrawal

Cookie settings allow optional categories to be rejected, analytics and marketing to be selected separately, or all optional categories to be accepted. Categories are not preselected. Closing the panel or giving no decision does not enable technologies requiring consent.

Change choices through the website cookie-settings control. Withdrawal applies prospectively without affecting earlier lawful processing. Deleting the choice cookie may display the panel again. Browsers also allow blocking and deletion; blocking essential cookies may disrupt login or language choice, while refusing optional ones does not block purchased services.

5. Grounds and updates

Electronic Communications Law Article 399 governs storage and access to device information, including exceptions for necessary operations. Further processing of personal data also follows GDPR. The Privacy policy identifies purposes and grounds of server-side processing.

The inventory must be updated alongside technology deployment. Current and previous versions appear in the Legal centre. Editing this policy alone does not authorise new tracking.
